

IBEM-IS Data Use Proposal Submission Guide

Please answer the following questions. Maximum length: 1 page single-spaced

1. Describe the rationale for your study (one paragraph).
2. What hypothesis will you test?
3. What clinical information from IBEM-IS will facilitate testing of this hypothesis?
4. What is the clinical significance of your observations?
5. Recognizing that projects evolve, what is the first product you envision from your observation (paper, protocol, larger project, etc.)?
